

Design the **Person** and **WhiteWalker** class so that the following output has been generated: (You have to use **Inheritance** where necessary)

*Hint: Only the **Targaryen** families have dragons.*

```
class GameOfThrones:
    chars = {}
    all_status = {}
    def __init__(self, name, age, title):
        self.__name = name
        self.__age = age
        self.__title = title
        self.__status = 'Alive or Dead'
    def setName(self, name):
        self.__name = name
    def getName(self):
        return self.__name
    def getAge(self):
        return self.__age
    def killPerson(self):
        print('The Lannisters send their regards!')
```

Person.showGotInfo()
print(1, '-'*25)
