

Fall2022 CSE220 Quiz-4
Total Marks: 10

Name:

ID:

Sec:

1.	Complete the method below which takes a head of a singly list containing numbers in the form of strings. The method will generate a valid index number for a hashtable of length 5. The formula to generate the index is $\text{index} = 3 * (\text{sum of each digit})$. ** If you think you need to change the formula you can do ONE change. (change includes edit, delete or add) <pre>def findIndex(head): # print each index</pre>	5
2.	a. Draw a BST using the numbers. [14, 34, 22, 5, 7, 9, -3, 28, 18] b. Find the post order traversal of the BST.	2 + 3
