CSE220 Quiz 1 Set A
Marks: 10

10
Name: Jannatul Somiya Mahmud (22101698)

Section: 12

enqueue

1.	Given a doubly linked list. Write the dequeue method. "head" is the head of the list (which can be empty). "x" is the item to be enqueued.. def enqueue (head, x): return head # <i>return head at the end</i>	4
2.	a. Why is a circular array used in a queue? b. Given a set of elements, draw a circular array of length 6. Enqueue an element if it is any <u>alphabet or number</u> and dequeue otherwise. Write the dequeued elements in order. Show your enqueue clearly and point the start of the array with an arrow. Elements: 1, 2, *, ^, 3, 4, &, 5, A, B, C, %, D, @, #.	2 + 4
