

CSE 320 Quiz 1

Group 12

Total marks: 20 Time: 20 minutes

ID	
Name	

1. In the TCP/IP protocol suite, which layer is responsible for addressing and routing packets across multiple networks? (1)
 - a. Application layer
 - b. Network Layer
 - c. Transport Layer
 - d. Physical Layer
2. Which one of the following is a logical address? (1)
 - a. MAC address
 - b. Port address
 - c. IP address
 - d. Email address
3. What should be the minimum size of a data link layer header? (1)
 - a. 48 bits
 - b. 96 bits
 - c. 48 bytes
 - d. 96 bytes
4. Which of the following is not the responsibility of the transport layer? (1)
 - a. Error Control
 - b. Connection Control
 - c. Flow Control
 - d. Host-to-host delivery
5. Which of the following is not a valid IP address? (1)
 - a. 192.168.0.1
 - b. 127.0.0.1
 - c. 192.168.0.256
 - d. 172.16.50.1
6. Why do we need layers in networking? Mention the layers in the OSI model and how they are mapped to the TCP/IP model. (7)
7. A system has an n-layer protocol hierarchy. Applications generate messages of length M bytes. At each of the layers, an h-byte header is added. What fraction of the network bandwidth is filled with headers? (8)
