Course Description: Macroeconomics is the study of aggregate economic behavior of the entire economy. This course introduces the basic theoretical models used in macroeconomics and examines the key macroeconomic variables. This course is the foundation for Macroeconomics and is required for better understanding of any further macroeconomic course. This course aims to develop a general framework to analyze and understand the real-world macroeconomic experiences. The key topics included are aggregate demand and supply, national income accounting and public accounts, GDP and economic growth, business cycles, unemployment and inflation, money and interest rates, fiscal and monetary policy. Students will also learn about Keynesian, Classical, and Monetarist views of how the economy works and about what policy authorities should do – if anything – to intervene in the macro economy.

Course readings: The required textbook for this course is **the 10th edition of Economics by Michael Parkin, Pearson, 2012.**

Academic Integrity: Each student in this course is expected to abide by the BRAC University Code of Academic Integrity. Students are encouraged to study together and to discuss information and concepts covered in lecture with other students. However, copying from another student or copying from published or unpublished or electronic sources without appropriate citations will be considered as plagiarism. Such dishonest practices will automatically result in students getting zero marks. During examinations, you must do your own work. Cheating (for example, passing of answers, copying, *etc.*) will not be tolerated. Talking or discussion is not permitted during the examinations, nor may you compare papers, or collaborate in any way. Any collaborative behavior during the examinations will result in failure of the exam, and may lead to university disciplinary action.

Accommodation for students with disabilities: I am available to discuss appropriate academic accommodations that may be required for student with disabilities. Requests for academic accommodations are to be made during the first three weeks of the semester, except for unusual circumstances, so arrangements can be made. Students are encouraged to register with Student Disability Services to verify their eligibility for appropriate accommodations.

Disclaimer: The instructor reserves the right to make changes to any part of this syllabus. Should such instances arises, students will be notified in advance.
